

Student Evaluations – Gender and International Human Rights Fall 2016

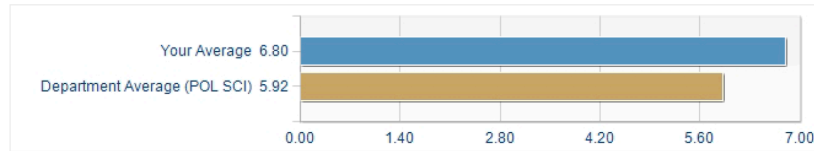

The instructor encouraged student questions and participation

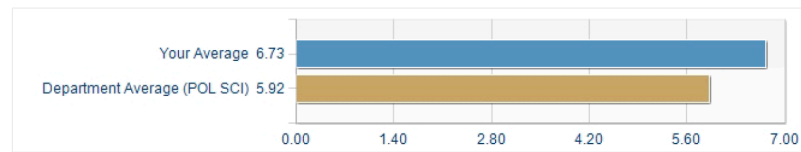

The instructor encouraged student questions and participation

The instructor was helpful when I had difficulties or questions

The instructor explained concepts clearly

Anonymous Comments

The GSI was very relatable and was truly effective on helping us write for all three paper. She was super informative and highlighted key concepts and held interesting discussions, without fail.

She is nonjudgmental and sees conservative and liberal values and does not judge. She is creative and brings in additional research/ data. She listens to feedback and is willing to rework anything you want.

Constructive and effective feedback, available and easy to reach to, gave us all the key terms from the weekly readings on which we should focus.

The discussion section with Melanie answered any questions I had about the subject material. She presented and reviewed the information it with clarity, and was incredibly accessible outside of class. I thoroughly enjoyed her sections and have no complaints

Melanie has been the best GSI I've had at Cal. She offers numerous writing tips, study tips, and all around success tips. She coherently intertwines all of the concepts in the course in subsection, and she is very willing to foster debates and discussions about controversial topics.

Melanie's greatest asset is her ability to empathize with her students. Not only does she recognize when a majority of the class is doing well, but she also recognizes when students are struggling and spends extra time on particular concepts and course work.

She also provides and facilitates environments that truly allow for opposing and challenging views, while maintaining respect amongst her students.
